

(a) ISA targets (Rust core; the byte-level claim)

ISA	runner	build	byte-id. K	binary-CT
x86-64	Linux, Win-MSVC	✓	✓ (run)	✓ Memcheck
aarch64	Linux, macOS	✓	✓ (run)	✓ Memcheck
wasm32	node	✓	✓ (run)	source-CT
riscv64	Linux (cross)	✓	by constr. [†]	source-CT
thumbv7em	bare-metal	✓	by constr. [†]	n/a

[†] cross-compiled, not run natively; identity follows from FIPS-deterministic encodings + identical source.

(b) language face × OS (shared vector → same K)

Face	Linux	macOS	Windows
Rust	✓	✓	✓
C ABI	✓	✓	✓ (MSVC)
WASM (node)	✓	✓	✓
Swift	–	✓	–
Kotlin (JVM/FFM)	✓	✓	–

✓ verified (CI or local); – not exercised.
